Beta: 0.87

(Based on monthly returns over the past 3 years Mibor has been assumed as the risk-free rate of return)

Portfolio Turnover: 0.58

**Fund Manager's Comment:** For the month, we preferred to keep a relatively increased proportion of cash in the fund in the light of slower bank credit growth and anticipation of recession-based economy which caused banks to underperform. Overall, we have maintained a positive bias on Private Banks with decent capitalization coupled with prospects of improving credit demand. In NBFC sector, the exposure has been tilted to players who have clear resilience to liquidity shortage and a sustained growth prospect.
