2	5000	7000	7200.45	B = 7000

This minimum balance amount needed for SWP may be altered from time to time at the discretion of the AMC. Unitholders may terminate the SWP or change the amount of withdrawal, but not below the specified minimum, by giving 15 days notice to the Fund / R&T Agent. In such a scenario, AMC will have no obligation to communicate to the investor before automatic termination of SWP. It will also terminate automatically upon the receipt of notification of death or incapacity of the unitholder. SWP is not available for investments under lock-in period and pledge.

The investor can opt for direct credit of the redemption proceeds to their bank accounts & Taurus Mutual Fund will endeavor to credit the payout directly to that bank account through available electronic mode(s) (ECS/Direct Credit). Hedging does not mean maximisation of returns but only reduction of systematic or market risk inherent in the investment.

For details on derivative strategy, please refer SAI.

Portfolio Turnover

“Portfolio Turnover” is the term used by any Mutual Fund for measuring the amount of trading that occurs in a Scheme’s portfolio during the given period. All the schemes being open-ended schemes, it is expected that there would be a number of subscriptions and repurchase on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. However, a high turnover would not significantly affect the brokerage and transaction costs. The Fund will endeavour to balance the increased cost on account of higher portfolio turnover with the benefits derived thereof. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of arbitrage opportunities that exist for scrips / securities held in the portfolio rather than an indication of a change in Fund view on a scrip, etc.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Benchmark : BSE 100TRI

Performance comparisons of the Schemes will be made vis-à-vis their respective Benchmark. However, the Schemes’ performance may not be strictly comparable with the performance of the respective Benchmark due to the inherent differences in the constructions of the portfolios.

The Board of TAMCO has also constituted an Investment Monitoring Committee comprising of two Independent Directors, two Non-Independent Directors and Managing Director of the Company. The performances of the schemes of the Mutual Fund are reviewed by the Investment Monitoring Committee at its meeting held every month. Further, in terms of SEBI Circular No. MFD/CIR/16/400/02 dated March 26, 2002 the performance of Schemes will be benchmarked against the performance of their respective Benchmark. The same have been chosen as the benchmark as the asset allocation pattern of the benchmark is in conformity with the declared asset allocation pattern of the schemes in the Scheme Information Document.

The performance of the Schemes compared to its benchmark indices will be reviewed at every meeting of the Board of Directors of the AMC and Trustee and corrective action as proposed will be taken in case of unsatisfactory performance.

In terms of SEBI Circular No. sMFD/CIR/01/ 071/02 dated April 15, 2002, the AMC and Trustee may change the benchmark index or select an additional benchmark index after recording adequate justification for carrying out such change. However, change of benchmark index and/ or selecting additional benchmark indices would be done in complete compliance of the relevant guidelines of SEBI in this regard.

Justification for use of benchmark:

The aforesaid Benchmark is the Tier 1 benchmark Index basis the category of the scheme and is in line with the benchmark as notified by AMFI.

PART III- OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value per unit shall be calculated by dividing the Net Assets of the Scheme by the total number of units outstanding under the scheme on the valuation date. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VII of the SEBI Regulations or such norms as may be specified by SEBI from time to time.

NAV of the units of the scheme shall be calculated as shown below:

NAV ₹ Per unit = Market or Fair value of Scheme's investments + Current Assets - Current Liabilities and Provisions / No. of units outstanding under the scheme

Illustration on Computation of NAV:

Particulars	Amount(Rs)	Asset/Liability
Securities	5,00,000	Asset
Cash & Cash Equivalent	3,00,000	Asset
Receivables	2,00,000	Asset
Accrued Interest	50,000	Asset
Total Assets	1,050,000	
Short-term Liabilities	200,000	Liability
Long-term Liabilities	150,000	Liability
Accrued Expenses	1,00,000	Expense
Total Liabilities and Expenses	4,50,000	

Particulars	Amount (Rs)
-------------	-------------

Total Assets (A)	1,050,000
Total Liabilities & Expenses (B)	4,50,000
Net Asset Value = (A-B)	6,00,000
Total Units Outstanding	1,000
NAV Per Unit	600 Per Unit

In respect of Taurus Largecap Fund (formerly known as Taurus Large Cap Equity Fund), Net Asset Value will be rounded off upto two decimal points.

The NAV will be calculated on all Business Days. The AMC will prominently disclose the NAVs under a separate head on the website of the Fund www.taurusmutualfund.com. and on the website of Association of Mutual Funds in India (AMFI). Investor may write to AMC on customercare@taurusmutualfund.com for availing facility of receiving the latest NAVs through SMS.

Pursuant to Regulation 49 (3) the repurchase Price of the units of an open ended scheme will not be lower than 95% of the NAV. Any imposition or enhancement of Load in future shall be applicable on prospective investments only.

Ongoing price for Redemption (sale) /Switch outs (to other schemes/plans of the Mutual Fund) by Investors.

Ongoing price for redemption /Switch out (to other Schemes/Plans of the Mutual Fund) is the price which a Unit holder will receive for redemption/Switch-outs. During the continuous offer of the Scheme, the Unit holder can redeem the Unit at Applicable NAV, subject to payment of Exit Load, if any.

It will be calculated using the following formula:

Redemption Price = Applicable NAV*(1-Exit Load, if any)

Example: If the Applicable NAV is Rs. 10, Exit Load is 2% then redemption price per unit will be calculated as follows:

= Rs. 10* (1-0.02)

= Rs. 9.80

For other details such as policies w.r.t computation of NAV, rounding off, procedure in case of delay in disclosure of NAV etc. refer to SAI.

Illustration of Impact of expense ratio on scheme's returns

To see how expense ratios can affect the investments over time, let’s compare the returns of several hypothetical investments that differ only in expense ratio. The following table depicts the returns on ₹10,000 initial investment, assuming an average annualized gain of 10%, with different expense ratios (0.50%, 1%, 1.50% and 2%):

Year	10% Gain (₹)	Expenses Ratio			
		0.50%	1.00%	1.50%	2.00%
0	10000.00	10000.00	10000.00	10000.00	10000.00
1	11000.00	10950.00	10900.00	10850.00	10800.00
2	12100.00	11990.50	11881.50	11773.00	11668.00
3	13310.00	13129.00	12951.92	12775.33	12610.00
4	14641.00	14375.00	14116.00	13874.00	13632.00
5	16105.10	15739.00	15386.00	15064.00	14742.00
	Less Received	366.1	719.1	1041.1	1363.1
	Less (Percentage)	2.27	4.47	6.46	8.46

If an investor had invested ₹10,000 in the scheme with a 2.00% expense ratio, the value of the investment would be ₹ 14742 after 5 years. Whereas, if the investor had invested ₹ 10,000 in a scheme with 0.50% expense ratio, the investment would be worth ₹ 15739 after 5 years.

I. INTRODUCTION

A. DEFINITIONS/INTERPRETATION

For detailed description please refer [Definitions and Interpretation.pdf \(taurusmutualfund.com\)](http://taurusmutualfund.com/Definitions_and_Interpretation.pdf)

B. RISK FACTORS

Schemes Specific Risk Factors

Risks associated with equity and equity related instruments:

Equity and equity related instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as volume and volatility in the capital markets, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units issued under the Schemes may be adversely affected.

Further, the Equity and Equity Related Securities are risk capital and are subordinate in the right of payment to other securities, including debt securities.

Equity and Equity Related Instruments listed on the stock exchange carry lower liquidity risk; however the Schemes' ability to sell these investments is limited by the overall trading volume on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of a Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio may result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.

The Schemes may invest in securities which are not listed on the stock exchanges. These securities may be illiquid in nature and carry a higher amount of liquidity risk, in comparison to securities that are listed on the stock exchanges or offer other exit options to the investor. The liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Risks associated with Fixed Income and Money Market Instruments:

Price Risk/Interest Risk

Fixed Income and Money Market Instruments carry price risk (also known as interest rate risk). Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rate falls, the prices increase. In case of floating rate instruments, the general level of price risk is low (as compared to fixed rate instruments), however, these instruments are also subject to some amount of interest rate risk as the spread over the benchmark rate may change. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Prices of bonds/money market instruments traded change frequently (up or down) which in turn leads to changes in the NAV of the scheme which holds such securities.

Credit Risk

Credit risk or default risk refers to the risk that the issuer of a fixed income security may default on interest payment or paying back the principal amount on maturity. In case of Government Securities, there is minimal credit risk. Lower rated or unrated securities carry a higher credit risk as compared to higher rated securities.

Liquidity or Marketability Risk

The ability of a fund to execute sale/purchase orders is dependent on the liquidity of the underlying securities. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. The securities that are listed on the stock exchange carry lower liquidity risk, but the ability to sell these securities is limited by the overall trading volumes. Further, different segments of Indian financial markets have different settlement cycles and may be extended significantly by unforeseen circumstances.

Re-investment Risk

This refers to the risk that intermediate cash flows received from a security is re invested at a different rate than assumed at the time of purchase.

Prepayment Risk

Certain fixed income securities give an issuer a right to call back its securities before their maturity date. This right is generally exercised when interest rate has declined. The proceeds received when such right is exercised may get invested at lower yield as the interest rate have declined. This risk of deploying proceeds at lower rate is known as prepayment risk.

Risks associated with investments in Government Securities:

The Government Securities Market is the largest and most liquid market in India, with the large participants being banks, non-banking finance companies, insurance companies and provident funds which are required by statutes to invest in Government securities. The government securities are being issued in a tenure starting from 3m upto 40 years at present. It is more liquid in nature because of large investor base as compared to corporate bonds. Since, it is being issued over long tenure compared to corporate bonds, it carries higher interest rate risk on long tenure securities. Since the security is sovereign in nature, the credit risk is minimal.

Risks associated with Investing in Derivatives:

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by a Fund Manager involve uncertainty and decision of a Fund Manager may not always be

profitable. No assurance can be given that a Fund Manager will be able to identify or execute such strategies. The scheme may invest in Derivative and will allow a max exposure of 20% of the portfolio in Derivatives.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments. Other risks include risk of mis- pricing or improper valuation and the inability of the derivative to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby a Scheme may not be able to sell or purchase derivative quickly enough at a fair price.

Risks associated with Securities Lending:

The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply with can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

The Fund Manager will apply the following limit – Not more than 20% of the net assets of the Scheme can generally be deployed in securities lending.

Risks associated with Short Selling:

The Scheme may enter into short selling transactions, subject to SEBI and RBI Regulations. Short positions carry the risk of losing money and these losses may grow unlimited theoretically if the price of the stock increases without any limit which may result in major losses to the Scheme. At times, the participants may not be able to cover their short positions, if the price increases substantially. If numbers of short sellers try to cover their position simultaneously, it may lead to disorderly trading in the stock and thereby can briskly escalate the price even further making it difficult or impossible to liquidate short position quickly at reasonable prices. In addition, short selling also carries the risk of inability to borrow the security by the participants thereby requiring the participants to purchase the securities sold short to cover the position even at unreasonable prices.

Risks associated with transactions in units through Stock Exchange Mechanism:

In respect of transactions in Units of the Scheme through NSE and/ or BSE or any other recognized stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/ settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognized exchange in this regard.

Settlement Risk:

Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Portfolio to make purchases in intended securities due to settlement problems could cause the Portfolio to miss certain investment opportunities.

Regulatory Risk:

The value of the securities may be affected by uncertainties such as changes in government policies, changes in taxation, and other developments in the laws and regulations.

Risk Associated with Unlisted Securities:

Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted domestic securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Risks associated with investing in Tri Party Repo through CCIL(TREPS):

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall". As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members.

Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

C. RISK MITIGATION PROCESS

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in equity and debt markets. The Fund has identified the following risks of investing in equity and debt instruments and designed risk management strategies to mitigate and manage such risks.

Risk associated with portfolio construction: AMC has incorporated adequate safeguards to manage risks in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. Fund Management team has adequate processes in place for identifying & analyzing the various risk ratios. Various checks have been put in place to adhere to the Investment Restrictions. AMC is using Miles MoneywareFundware as Front Office System.

Market Liquidity Risk and investment in unlisted securities: Fund Manager would invest in those securities that are expected to have more market liquidity. The first access to liquidity is through cash and fixed income securities. The investment in unlisted securities will be minimal and regularly monitored by Investment Committee and Investment Monitoring Committee.

Risk associated with Equity derivatives: Equity derivatives may be used for directional (including equalization of cash) and yield enhancement strategies. The credit risk associated with equity derivatives is decreased as only exchange traded equity derivatives are permitted. On portfolio and regulatory limits, there are internal limits and there is an established monitoring process.

Quality Risk or risk of investing in unsustainable/ weak companies: Investment universe is carefully selected to only include high quality businesses.

Concentration Risk: Investment will be made as far as possible across the market capitalization spectrum and industries/sectors keeping the Investment Objective of the Scheme in view.

Credit Rating Risk: The endeavor is to invest in fixed income securities which have high credit quality and preferably have high rating from rating agencies such as CRISIL, ICRA, CARE or India Ratings & Research. The probability of rating downgrade is low. The due diligence performed by the fund management team before assigning credit limits should mitigate company specific issues.

Interest Rate Risk: Interest rate risk is managed by meticulous determination of average maturity of the portfolio. Extensive analysis of macro economic conditions is carried out to form a view of future interest rates and to position the portfolio accordingly.

Risk associated with Stock Lending: At present, there is no significant activity in the Securities Borrowing and Lending market. The Fund has so far not participated in Securities Lending market. However, we understand the risks associated with the securities lending business and the AMC will have appropriate controls (including limits) before initiating any transactions.

Procedure followed for Investment Decision & Risk Control Measures

Before making any fresh investment through primary market or secondary market, the research team prepares a detailed Research Report on each investment based on the fundamental as well as the technical analysis. The Board of Trustees in terms of SEBI's guidelines has approved the format of the Research Reports. The companies are identified for investment based on top down/ bottom up approach as well as in-depth market analysis.

Thereafter, the Research Report is discussed amongst the Investment Committee members comprising of the CEO, CIO, Fund Managers - Debt & Equity, Vice President – Operations and Research Analyst. The Investment Committee approves or rejects a stock. The stocks approved form a part of the stock universe. The Fund

Manager then decides on the timing, quantity & price at which to buy or sell a share within the framework of the Investment Policy. The Fund Manager also takes into account the market conditions, investment/redemption flows and other external factors. The reasons for subsequent purchase and sale of the same instrument are also being recorded. An Investment Committee looks into the following matters-

Adherence to Prudential Investment guidelines
Choosing the universe of stock for Equity investments.
Addition/Deletion of stocks to the universe of stocks. Adherence to Derivatives trading guidelines.

Risk management and risk mitigation issues.

The Investment Committee meeting is held once a month.

The Board of TAMCO has also constituted an Investment Monitoring Committee comprising of two Independent Directors, two Non-Independent Directors and Managing Director of the Company. Investment Monitoring Committee Meeting is held every month and reviews Investments/ disinvestments made since last meeting, Research Reports etc.

E. TAXATION

For details on taxation please refer to the clause on Taxation in the SAI apart from the following:

The information is provided for general information only. However, in view of the individual nature of the implications, each investor is advised to consult his or her own tax advisors/authorised dealers with respect to the specific amount of tax and other implications arising out of his or her participation in the schemes.

This note is relevant for investors investing in equity oriented schemes¹ of the Mutual Funds. For a fund which is not in the nature of an equity oriented fund, investors may refer to the scheme information document applicable to such funds.

¹ “Equity oriented fund” is defined under 112A of the Income-tax Act, 1961, to mean a fund set up under a scheme of a mutual fund specified under clause (23D) of section 10 and,—

(i) in a case where the fund invests in the units of another fund which is traded on a recognised stock exchange (*this refers to fund of fund schemes*),—

(B) such other fund also invests a minimum of ninety per cent of its total proceeds in the equity shares of domestic companies listed on a recognised stock exchange; and

For further details on taxation please refer to the clause on Taxation in the SAI		

Note: Surcharge and Health & education cess (please refer paragraph 7) will be payable in addition to the applicable taxes, wherever applicable. Further, the TDS rates on dividend income is mentioned in paragraph 8. As per section 2(42A) of the Income-tax Act, 1961 ('the Act'), a unit of equity oriented fund held by the investor as a capital asset, is considered to be a short-term capital asset, if it is held for 12 months or less from the date of its acquisition by the unit holder. Accordingly, if such assets are held for a period of more than 12 months, it is treated as a long-term capital asset.

1) Long-term capital gains

The Finance Act, 2018 has introduced section 112A (effective 1 April 2018) to tax long-term capital gains arising from transfer of units of equity oriented mutual funds. Such gains, exceeding Rs.100,000, will be taxed at concessional rate of 10 percent (plus surcharge and cess), provided the transfer is subject to STT, as applicable.

Section 112A of the Act also provides relief in computation of gains on sale of units acquired before 1 February 2018 such that the cost of acquisition ('COA') of such units is to be considered the higher of

- Actual COA of the units; and
- Lower of
 - FMV² of the unit; and
 - Redemption value/Sale consideration on transfer of the units

(ii) in any other case, a minimum of sixty-five per cent of the total proceeds of such fund is invested in the equity shares of domestic companies listed on a recognised stock exchange.

It is also provided that the percentage of equity shareholding or unit held in respect of the fund, as the case may be, shall be computed with reference to the annual average of the monthly averages of the opening and closing figures

² In case of a listed unit, the FMV means the highest price of such share or unit quoted on a recognized stock exchange on 31 January 2018. However, if there is no trading on 31 January 2018, the FMV will be the highest price quoted on a date immediately preceding 31 January 2018, on which it has been traded. In the case of unlisted unit, the net asset value of such unit on 31 January 2018 will be the FMV.

Benefit of inflation indexation and foreign currency fluctuation will not be available for computing the cost.

Long term capital gains arising from transfer of units of an equity oriented mutual fund on a stock exchange would be taken into account in computing the book profit and tax will be payable by the company as per Minimum Alternate Tax ('MAT') provisions (section 115JB of the Act).

Further, in case of individuals/ HUFs, being residents, where the total income excluding long-term capital gains is below the maximum amount not chargeable to tax, then the difference between the current maximum amount not chargeable to tax and total income excluding long-term capital gains, shall be adjusted from long-term capital gains. Therefore, only the balance long-term capital gains (exceeding Rs. 100,000) will be liable to income tax at the rate of 10 percent plus applicable surcharge and cess.

2) Short-term Capital Gains

As per section 111A of the Act, short-term capital gains from the sale of units of an equity oriented fund on a recognised stock exchange or sale of such units to the mutual fund is taxed at 15 percent, provided such transaction of sale is chargeable to STT. The said tax rate would be increased by surcharge and cess as mentioned in paragraph 7.

In case of resident individual or HUF, if the income from short-term capital gains is less than the maximum amount not chargeable to tax, then there will be no tax payable.

Further, in case of individuals/ HUFs, being residents, where the total income excluding short-term capital gains is below the maximum amount not chargeable to tax³, then the difference between the current maximum amount not chargeable to tax and total income excluding short-term capital gains, shall be adjusted from short-term capital gains. Therefore, only the balance short term capital gains will be liable to income tax at the rate of 15 percent plus surcharge and cess.

3) Income from mutual fund units

With effect from 1 April 2020, income distribution tax has been abolished and now the dividend income will be taxed in the hands of the unitholder at applicable slab rates/ tax rates as mentioned in paragraph 6 and 20% in case of FPIs under section 115AD. Further, the applicable TDS rates are mentioned in paragraph 8 below.

Further, as per section 57, the resident unitholders can claim deduction of interest expense to the extent of 20 per cent of income in respect of such units, included in the total income for that year, without deduction under this section.

4) Any income, including gains from redemption of units of scheme of Mutual Fund, received by any person for, or on behalf of, the New Pension System Trust, is exempt in the hands of such person under section 10(44) of the Act.

5) STT will apply at the following rates in case of units of equity oriented fund purchased or sold:

Nature of Transaction	Payable by	Value on which tax shall be levied	Rates (%)
-----------------------	------------	------------------------------------	-----------

³ Basic Exemption Limit

For adopting the new tax regime, most of the deductions/exemptions such as section 80C, 80D, etc. are to be foregone. The Taxation Laws (Amendment) Act, 2019 has introduced two new sections i.e., section 115BAA and section 115BAB effective from financial year commencing 1 April 2019:

- Section 115BAA

As per section 115BAA, a domestic company can opt for paying tax at a lower rate of 22%, plus applicable surcharge and cess, subject to prescribed conditions especially such that certain deductions and exemptions need to be foregone. Further, the provisions of MAT will not apply to such companies. The option has to be exercised before the due date of filing the income-tax return. Once the option is exercised, it cannot be withdrawn subsequently.

- Section 115BAB

As per section 115BAB new domestic manufacturing companies, which have been set up and registered on or after 1 October 2019 and commenced manufacturing on or before 31 March 2024⁶, can opt for a lower tax rate of 15% plus applicable surcharge and cess subject to prescribed conditions especially such that certain deductions and exemptions need to be foregone.

Further, the provisions of MAT will not apply to such companies. The option has to be exercised before the due date of filing the income-tax return. Once the option is exercised, it cannot be withdrawn subsequently

Co-operative Society

7) Surcharge and Cess

The tax rates mentioned in paragraphs above would be increased by a surcharge of:

⁶ The FA 2022 has extended last date to commence manufacturing to 31-03-2024.

a) For Individuals, HUF, Artificial Juridical Person, AOP⁷ or BOI:

Nature of Income	Up to Rs. 50 lakhs	More than Rs. 50 lakhs but upto Rs. 1 crore	More than Rs. 1 crore but less than Rs. 2 crores	More than Rs. 2 crores but up to Rs. 5 crores	More than Rs. 5 crores
1. Short-term capital gain under section 111A;	NIL	10%	15%	15%	15%
2. Long-term capital gains under section 112A;					
3. Short term or Long-term capital gains under section 115AD(1)(b)					
4. income from units of MF8 – Residents and Non-residents	NIL	10%	15%	25%	37%*
5. Any other Income	NIL	10%	15%	25%	37%*

* FA 2023 has capped surcharge to 25% where the income of person is chargeable to tax under section 115BAC(1A).

b) For Firms and LLPs

12% where total income exceeds Rs. 10,000,000.

c) For Companies

⁷ The FA 2022 has capped surcharge at 15% in case of AOP consisting of only companies.

⁸ The FA 2021 caps the surcharge on "dividend". It appears for this purpose that dividend would mean dividend from equity shares and may not cover income from mutual fund schemes/income distributed by mutual funds. This is because the Income-tax Act in several places refers to dividend from equity as "dividend" and dividend from mutual fund as "income distributed by mutual fund". Based on such approach, "mutual fund dividend" is subject to super-rich surcharge.

Company	Total income upto Rs. 1 crore	Total income exceeds Rs. 1 crore but not Rs. 10 crores	Total income exceeds Rs. 10 crores
Domestic company	NIL	7%	12%
Domestic Company opting for section 115BAA and 115BAB	10%		
Foreign company	NIL	2%	5%

d) For co-operative Society

Income	Surcharge
Rs. 1,00,00,000 or less	Nil
Income exceeding Rs. 1,00,00,000 but not exceeding Rs 10,00,00,000	7%
Income exceeding Rs 10,00,00,000	12%

For co-operative society which opts to pay tax under section 115BAD of the Act and section 115BAE of the Act, as referred above, the rate shall be increased by surcharge @ 10%.

A health and education cess of 4% would be charged on amount of tax inclusive of the applicable surcharge for all taxpayers.

8) TDS on income from mutual funds

a) Dividend income

Category	TDS rate
Resident	10% (section 194K9)
FPI (corporate)	20% (section 196D)
FPI (non-corporate)	20% (section 196D)
Non-residents including corporates	20% (section 196A)

b) Capital gains

Category	TDS rate
Resident	NIL (section 194K10)

⁹ Threshold of Rs. 5,000 is applicable under section 194K.

¹⁰ As per section 194K, TDS is not required to be withheld on income in the nature of capital gains.

FPI (corporate)	NIL (section 196D11)
FPI (non-corporate)	NIL (section 196D)
Other non-residents:	
• Short-term capital gains under section 111A	15% (section 195)*
• Long-term capital gains under section 112A	10% (section 195) ^{12*}

*A non-resident eligible to claim treaty benefits, would be governed by the provisions of the Act to the extent that they are more beneficial. Accordingly, tax should be withheld as per the provisions of the Act or the provisions of the relevant Double Taxation Avoidance Agreement ('DTAA'), whichever is more beneficial. However, the unit holder will be required to provide appropriate documents to the Mutual Fund in order to be entitled to a beneficial rate under such DTAA. The implications of the provisions of General Anti-avoidance Rules ('GAAR')¹³ and Multilateral instrument ('MLI')¹⁴ will also need to be evaluated.

Requirement to furnish PAN

As per section 206AA, if any deductee (investor) fails to furnish or furnishes incorrect permanent account number (PAN) to deductor (mutual fund), tax shall be deducted at higher of the following rates, namely: -

- (i) at the rates specified in the relevant provision of this Act; or
- (ii) at the rate or rates in force; or
- (iii) at the rate of twenty per cent

Further, where the PAN of a resident becomes inoperative due to non-linking of PAN with Aadhaar, it shall be deemed that PAN has not been furnished.

Higher rate of TDS for non-filer of Income tax return

As per section 206AB, tax will be deducted in case of an investor being a specified person* at higher of the following rates, namely: -

- (i) at twice the rate specified in the relevant provision of the Act; or
- (ii) at twice the rate or rates in force; or
- (iii) at the rate of five per cent

¹¹ As per section 196D(2) of the Act, income-tax is not required to be withheld from any income arising to FPIs by way of capital gains on transfer of shares and units referred to in section 115AD.

¹² The FA 2022 has provided that TDS on long term capital gain under section 112A will be calculated on capital gains exceeding Rs.1,00,000.

¹³ GAAR may be invoked by the Indian income-tax authorities if arrangement(s) are found to be impermissible avoidance arrangements. The CBDT has issued clarifications on GAAR (Circular No. 7/2017 dated 27 January 2017). The provisions of GAAR are effective from the financial year commencing April 1, 2017.

¹⁴ The Organisation of Economic Co-operation and Development ('OECD') released the Multilateral Convention to implement Tax Treaty related measures to prevent Base Erosion and Profit Shifting ('MLI'). The MLI, amongst others, includes a "principal purpose test", wherein Tax Treaty benefits can be denied if one of the principal purpose of an arrangement or a transaction was to, directly or indirectly, obtain tax benefit. The MLI has also expanded the scope of permanent establishment to include agent (excluding an independent agent) playing principal role, leading to routine conclusion of contracts without material modification. For this purpose, an agent is not considered independent if it acts exclusively or almost exclusively on behalf of one or more closely related enterprises. India has been an active participant in the entire discussion and its involvement in the BEPS project has been intensive. In a ceremony held in Paris on 7 June 2017, various countries including India, signed the MLIs.

*Specified persons (excluding a non-resident who does not have a permanent establishment in India or a person not required to furnish return of income and is notified by the Central Government) means any person who has not filed the return for the previous year immediately preceding the previous year in which tax is required to be deducted; whose time limit to file return has expired and the aggregate of tax deducted at source and tax collected at source is fifty thousand or more in the said previous year.

¹⁵ Non-corporates cover individual, HUF, association of persons or body of individuals, whether incorporated or not, and artificial juridical person.

¹⁶ The FA 2021 caps the surcharge on "dividend". It appears for this purpose that dividend would mean dividend from equity shares and may not cover income from mutual fund schemes/income distributed by mutual funds. This is because the Income-tax Act in several places refers to dividend from equity as "dividend" and dividend from mutual fund as "income distributed by mutual fund". Based on such approach, "mutual fund dividend" is subject to super-rich surcharge.

Nature of Income	Up to Rs. 50 lakhs	More than Rs. 50 lakhs but upto Rs. 1 crore	More than Rs. 1 crore but less than Rs. 2 crores	More than Rs. 2 crores but up to Rs. 5 crores	More than Rs.5 crores	More than Rs. 10 crores

If section 206AA is applicable to a specified person, in addition to the provision of section 206AB, the tax shall be deducted at higher of the two rates provided in section 206AB and in section 206AA.

9) Surcharge on TDS

- In case of TDS on payments made to residents, the tax rates would not be increased by surcharge and cess.
- In case of TDS on payments made to non-residents, the tax rates would be increased by surcharge and cess. The surcharge rates are as under:

* FA 2023 has capped surcharge to 25% where the income of such person is chargeable to tax under section 115BAC(1A).

The rate of health and education cess is 4%. (applicable on tax plus surcharge).
