Quantitative Data

Regular Plan :

Sharpe Ratio: 0.41
Standard Deviation: 12.52%
Beta: 0.98
Portfolio Turnover: 0.05
Tracking Error: 0.05

Why Taurus Nifty 50 Index Fund ?

- Great for investors who want to invest in equities but do not want to expose yourself to the risks associated with actively managed equity Funds
 - Great for investors who want to benefit from India's economic growth but do not have time/ability to research individual stocks or processes of active mutual Funds
 - Equities are volatile in short term, but an index Fund averages out gains over longer term, leading to more sustainable returns
 - Less than one-fifth the management fee of an actively managed equity mutual Fund
 - Actively managed equity mutual Funds are prone to human errors and not beating Nifty50 index while charging higher fee whereas our Index Fund has no such risk as it mimics the index performance while charging lower fee
- "If you like spending six to eight hours per week working on investments, do it. If you don't, then dollar-cost average into index Funds." ~Warren Buffett.

Fund Manager Comments : The index Fund continues to track the performance of its benchmark indices Nifty. The Fund portfolio consists of the stocks in the same weight as they are in the Nifty Index. The strategy of the investment is to mirror the index return by minimizing the tracking error with its benchmark.
