Internal Norms for Investment Restrictions

Fund has policy of Internal Norms for Investment Restrictions also within the overall limit prescribed by SEBI which is being reviewed from time to time, depending upon the market conditions.

According to this policy, limits on exposure to sectors, industries, companies etc. will be fixed to avoid concentration of portfolio in particular sectors so as to ensure appropriate

	<p>diversification/security for the Fund.</p> <p>The purpose of this policy will be to make investments in the full spectrum of permitted investments in order to achieve the investment objective of the scheme. Internal risk parameters for limiting exposure to a particular scrip or sector may be prescribed from time to time to respond to the dynamic market conditions and market opportunities.</p> <p>.</p>
<p>Risk Profile of the scheme</p>	<p>Mutual Fund units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p> <p>Schemes Specific Risk Factors</p> <p>1. Risks associated with equity and equity related instruments: Equity and equity related instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as volume and volatility in the capital markets, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units issued under the Schemes may be adversely affected.</p> <p>Further, the Equity and Equity Related Securities are risk capital and are subordinate in the right of payment to other securities, including debt securities.</p> <p>Equity and Equity Related Instruments listed on the stock exchange carry lower liquidity risk; however the Schemes' ability to sell these investments is limited by the overall trading volume on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of a Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio may result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.</p> <p>The Schemes may invest in securities which are not listed on the stock exchanges subject to compliance with the ethical principles. These securities may be illiquid in nature and carry a higher amount of liquidity risk, in comparison to securities that are listed on the stock exchanges or offer other exit options to the investor. The liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.</p> <p>2. Risks associated with transactions in units through Stock Exchange Mechanism: In respect of transactions in Units of the Scheme through NSE and/ or BSE or any other recognized stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/ settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognized exchange in this regard.</p> <p>3. Settlement Risk: Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Portfolio to make purchases in intended securities due to settlement problems could cause the Portfolio to miss certain investment opportunities.</p> <p>4. Regulatory Risk: The value of the securities may be affected by uncertainties such as changes in government policies, changes in taxation, and other developments in the laws and regulations.</p> <p>.</p>

5. **Risk Associated with Ethical Investing:**

Following the ethical principles will be an ongoing exercise and continue to evolve based on the experience gained by the Fund Management team. TAMCO may also seek guidance from identified ethical advisors for the interpretation of the principle. Taurus Mutual Fund shall interpret the same to the best of its knowledge and guidance. The scheme will only invest in securities which meet the ethical status of principle and fund management is required to review the various disclosures made by such companies and will also due diligence as part of the research process before investment. The fund manager will exit from the securities if they fail to comply with the ethics principles. This may restrict the ability of schemes to sell at a desired price.

For details on risk factors and risk mitigation measures, please refer SID.
