The Taurus OptiSIP instalment will be calculated based on the portfolio value on T-5 days before the instalment date. Irrespective of the formula* amount, the maximum and minimum investment will be limited by the maximum & minimum instalment amounts as chosen by the investor initially.

Please refer Section II of the document for further details for each instrument.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The Asset Management Company will use Modern Investment Management Tools and Techniques for proper selection of securities and devising a diversified portfolio across industries and companies. The objective of investment analysis would be to predict price movements on the stock markets so as to earn risk adjusted returns. Undervalued shares would be identified in order to trade profitably in them.

Fundamental analysis would be carried out to forecast, among other things, future level of economy's gross national product, future sales and earnings for a number of industries and a large number of companies. Eventually such forecast will be converted into estimates of expected returns of specific shares and certain industries and stock market itself.

Technical analysis will be used to detect pattern in price movements to formulate optimum entry and exit points for investments.

The Asset Management Company would endeavour to assess correctly the trends of the stock market so as to shift the portfolio risk in accordance with the market forecast to achieve a higher return.

Portfolio Turnover

“Portfolio Turnover” is the term used by any Mutual Fund for measuring the amount of trading that occurs in a Scheme’s portfolio during the given period. All the schemes being open-ended schemes, it is expected that there would be a number of subscriptions and repurchase on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. However, a high turnover would not significantly affect the brokerage and transaction costs.

The Fund will endeavour to balance the increased cost on account of higher portfolio turnover with the benefits derived thereof. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of arbitrage opportunities that exist for scrips / securities held in the portfolio rather than an indication of a change in Fund view on a scrip, etc.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Benchmark : BSE 500 TRI

Performance comparisons of the Schemes will be made vis-à-vis their respective Benchmark. However, the Schemes’ performance may not be strictly comparable with the performance of the respective Benchmark due to the inherent differences in the constructions of the portfolios.

The Board of TAMCO has also constituted an Investment Monitoring Committee comprising of two Independent Directors, two Non-Independent Directors, Whole time Director and Managing Director of the Company. The performances of the schemes of the Mutual Fund are reviewed by the Investment Monitoring Committee at its meeting held every month. Further, in terms of clause 1.8 of SEBI Master Circular dated June 27, 2024 the performance of Schemes will be benchmarked against the performance of their respective Benchmark. The same have been chosen as the benchmark as the asset allocation pattern of the benchmark is in conformity with the declared asset allocation pattern of the schemes in the Scheme Information Document.

The performance of the Schemes compared to its benchmark indices will be reviewed at every meeting of the Board of Directors of the AMC and Trustee and corrective action as proposed will be taken in case of unsatisfactory performance.

In terms of clause 1.8 of SEBI Master Circular dated June 27, 2024, the AMC and Trustee may change the benchmark index or select an additional benchmark index after recording adequate justification for carrying out such change. However, change of benchmark index and/ or selecting additional benchmark indices would be done in complete compliance of the relevant guidelines of SEBI in this regard.

Justification for use of benchmark:

The aforesaid Benchmark is the Tier 1 benchmark Index basis the category of the scheme and is in line with the benchmark as notified by AMFI.

Ongoing price for Redemption (sale) /Switch outs (to other schemes/plans of the Mutual Fund) by Investors.

Ongoing price for redemption /Switch out (to other Schemes/Plans of the Mutual Fund) is the price which a Unit holder will receive for redemption/Switch-outs. During the continuous offer of the Scheme, the Unit holder can redeem the Unit at Applicable NAV, subject to payment of Exit Load, if any.

It will be calculated using the following formula:

Redemption Price = Applicable NAV*(1-Exit Load, if any)

Example: If the Applicable NAV is Rs. 10, Exit Load is 2% then redemption price per unit will be calculated as follows:

= Rs. 10* (1-0.02)

= Rs. 9.80

Illustration of Impact of expense ratio on scheme's returns

For any scheme, NAV is computed on a daily basis factoring in all the assets as well as liabilities of the Scheme (including expenses charged). Expenses charged to the Scheme bring down its NAV and hence the investor's net returns on a corresponding basis.

Particulars	Regular Plan (Amount in Rs.)	Direct Plan (Amount in Rs.)
Amount Invested at the beginning of the year	10,000	10,000
Returns before Expenses	1,500	1,500
Expenses other than Distribution Expenses	150	150
Distribution Expenses	50	-
Returns after Expenses at the end of the Year	1,300	1350
Returns after Expenses at the end of the Year (in %)	13%	13.5%

Please Note:

The purpose of the above illustration is purely to explain the impact of expense ratio charged to the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments.

It is assumed that the expenses charged are evenly distributed throughout the year. The expenses of the Direct Plan under the Scheme may vary with that of the Regular Plan under the Scheme.

Calculations are based on assumed NAVs, and actual returns on your investment may be more, or less. Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to consult his or her own financial advisor.

Section II**I. INTRODUCTION****A. DEFINITIONS/INTERPRETATION**

For detailed description please refer [Definitions and Interpretation.pdf \(taurusmutualfund.com\)](https://www.taurusmutualfund.com/Definitions%20and%20Interpretation.pdf)

B. RISK FACTORS**Schemes Specific Risk Factors****1. Risks associated with equity and equity related instruments:**

Equity and equity related instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as volume and volatility in the capital markets, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units issued under the Schemes may be adversely affected.

Further, the Equity and Equity Related Securities are risk capital and are subordinate in the right of payment to other securities, including debt securities.

Equity and Equity Related Instruments listed on the stock exchange carry lower liquidity risk; however, the Schemes' ability to sell these investments is limited by the overall trading volume on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of a Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio may result, at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.

The Schemes may invest in securities which are not listed on the stock exchanges. These securities may be illiquid in nature and carry a higher amount of liquidity risk, in comparison to securities that are listed on the stock exchanges or offer other exit options to the investor. The liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

2. Risks associated with Fixed Income and Money Market Instruments:**Price Risk/Interest Risk**

Fixed Income and Money Market Instruments carry price risk (also known as interest rate risk). Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rate falls, the prices increase. In case of floating rate instruments, the general level of price risk is low (as compared to fixed rate instruments), however, these instruments are also subject to some amount of interest rate risk

as the spread over the benchmark rate may change. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Prices of bonds/money market instruments traded change frequently (up or down) which in turn leads to changes in the NAV of the scheme which holds such securities.

Credit Risk

Credit risk or default risk refers to the risk that the issuer of a fixed income security may default on interest payment or paying back the principal amount on maturity. In case of Government Securities, there is minimal credit risk. Lower rated or unrated securities carry a higher credit risk as compared to higher rated securities.

Liquidity or Marketability Risk

The ability of a fund to execute sale/purchase orders is dependent on the liquidity of the underlying securities. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. The securities that are listed on the stock exchange carry lower liquidity risk, but the ability to sell these securities is limited by the overall trading volumes. Further, different segments of Indian financial markets have different settlement cycles and may be extended significantly by unforeseen circumstances.

Re-investment Risk

This refers to the risk that intermediate cash flows received from a security is re invested at a different rate than assumed at the time of purchase.

Prepayment Risk

Certain fixed income securities give an issuer a right to call back its securities before their maturity date. This right is generally exercised when interest rate has declined. The proceeds received when such right is exercised may get invested at lower yield as the interest rate have declined. This risk of deploying proceeds at lower rate is known as prepayment risk.

3. Risks associated with investments in Government Securities:

The Government Securities Market is the largest and most liquid market in India, with the large participants being banks, non-banking finance companies, insurance companies and provident funds which are required by statutes to invest in Government securities. The government securities are being issued in a tenure starting from 3m upto 40 years at present. It is more liquid in nature because of large investor base as compared to corporate bonds. Since, it is being issued over long tenure compared to corporate bonds, it carries higher interest rate risk on long tenure securities. Since the security is sovereign in nature, the credit risk is minimal.

4. Risks associated with Investing in Derivatives:

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by a Fund Manager involve uncertainty and decision of a Fund Manager may not always be profitable. No assurance can be given that a Fund Manager will be able to identify or execute such strategies. The scheme may invest in Derivative and will allow a max exposure of 20% of the portfolio in Derivatives.

Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments. Other risks include risk of mis- pricing or improper valuation and the inability of the derivative to correlate perfectly with underlying assets, rates and indices, illiquidity risk whereby a Scheme may not be

able to sell or purchase derivative quickly enough at a fair price.

The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply with can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities, and this can lead to temporary illiquidity. The Fund Manager will apply the following limit – Not more than 20% of the net assets of the Scheme can generally be deployed in securities lending.

5. Risks associated with Short Selling:

The Scheme may enter into short selling transactions, subject to SEBI and RBI Regulations. Short positions carry the risk of losing money and these losses may grow unlimited theoretically if the price of the stock increases without any limit which may result in major losses to the Scheme. At times, the participants may not be able to cover their short positions, if the price increases substantially. If numbers of short sellers try to cover their position simultaneously, it may lead to disorderly trading in the stock and thereby can briskly escalate the price even further making it difficult or impossible to liquidate short position quickly at reasonable prices. In addition, short selling also carries the risk of inability to borrow the security by the participants thereby requiring the participants to purchase the securities sold short to cover the position even at unreasonable prices.

6. Risks associated with transactions in units through Stock Exchange Mechanism:

In respect of transactions in Units of the Scheme through NSE and/ or BSE or any other recognized stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/ settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognized exchange in this regard.

7. Settlement Risk:

Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Portfolio to make purchases in intended securities due to settlement problems could cause the Portfolio to miss certain investment opportunities.

8. Regulatory Risk:

The value of the securities may be affected by uncertainties such as changes in government policies, changes in taxation, and other developments in the laws and regulations.

9. Risk Associated with Unlisted Securities:

Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options. The AMC may choose to invest in unlisted domestic securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

10. Risks associated with investing in Tri Party Repo through CCIL(TREPS):

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default

member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall". As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members.

Thus, the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

C. RISK MITIGATION PROCESS

The Fund by utilizing a holistic risk management strategy will endeavour to manage risks associated with investing in equity and debt markets. The Fund has identified the following risks of investing in equity and debt instruments and designed risk management strategies to mitigate and manage such risks.

Risk associated with portfolio construction: AMC has incorporated adequate safeguards to manage risks in the portfolio construction process. Risk control would involve managing risk in order to keep it in line with the investment objective of the Scheme. Fund Management team has adequate processes in place for identifying & analyzing the various risk ratios. Various checks have been put in place to adhere to the Investment Restrictions. AMC is using Miles Moneyware Fundware as Front Office System.

Market Liquidity Risk and investment in unlisted securities: Fund Manager would invest in those securities that are expected to have more market liquidity. The first access to liquidity is through cash and fixed income securities. The investment in unlisted securities will be minimal and regularly monitored by Investment Committee and Investment Monitoring Committee.

Risk associated with Equity derivatives: Equity derivatives may be used for directional (including equalization of cash) and yield enhancement strategies. The credit risk associated with equity derivatives is decreased as only exchange traded equity derivatives are permitted. On portfolio and regulatory limits, there are internal limits and there is an established monitoring process.

Quality Risk or risk of investing in unsustainable/ weak companies: Investment universe is carefully selected to only include high quality businesses.

Concentration Risk: Investment will be made as far as possible across the market capitalization spectrum and industries/sectors keeping the Investment Objective of the Scheme in view.

Credit Rating Risk: The endeavour is to invest in fixed income securities which have high credit quality and preferably have high rating from rating agencies such as CRISIL, ICRA, CARE or India Ratings & Research. The probability of rating downgrade is low. The due diligence performed by the fund management team before assigning credit limits should mitigate company specific issues.

Interest Rate Risk: Interest rate risk is managed by meticulous determination of average maturity of the portfolio. Extensive analysis of macro-economic conditions is carried out to form a view of future interest rates and to position the portfolio accordingly.

Risk associated with Stock Lending: At present, there is no significant activity in the Securities Borrowing and Lending market. The Fund has so far not participated in Securities Lending market. However, we understand the risks associated with the securities lending business and the AMC will have appropriate controls (including limits) before initiating any transactions.

Procedure followed for Investment Decision & Risk Control Measures

Before making any fresh investment through primary market or secondary market, the research team prepares a detailed Research Report on each investment based on the fundamental as well as the technical analysis. The Board of Trustees in terms of SEBI's guidelines has approved the format of the Research Reports. The companies are identified for investment based on top down/ bottom-up approach as well as in-depth market analysis. Thereafter, the Research Report is discussed amongst the Investment Committee members comprising of the CEO, CIO, Fund Managers - Debt & Equity, Vice President – Operations and Research Analyst. The Investment Committee approves or rejects a stock. The stocks approved form a part of the stock universe. The Fund Manager then decides on the timing, quantity & price at which to buy or sell a share within the framework of the Investment Policy. The Fund Manager also takes into account the market conditions, investment/ redemption flows and other external factors. The reasons for subsequent purchase and sale of the same instrument are also being recorded. An Investment Committee looks into the following matters-

- a) Adherence to Prudential Investment guidelines
- b) Choosing the universe of stock for Equity investments.
- c) Addition/Deletion of stocks to the universe of stocks.
- d) Adherence to Derivatives trading guidelines.
- e) Risk management and risk mitigation issues.

TAMCO has constituted an Investment Committee as required pursuant to the Regulations. The Investment Committee meeting is held on a fortnightly basis.

The Board of TAMCO has also constituted an Investment Monitoring Committee comprising of two Independent Directors, two Non-Independent Directors and Managing Director of the Company. Investment Monitoring Committee Meeting is held every month and reviews Investments/ disinvestments made since last meeting, Research Reports etc.

Lock-in Period

Taurus Tax Shield is an Equity Linked Tax Saving Scheme (ELSS). In terms of Income Tax Act 1961, investment in Equity Linked Saving Schemes will have to be kept for a minimum period of 3 years from the date of allotment of units. As such investment made by investors in Taurus Tax Shield (an Equity Linked Saving Scheme) for the purpose of availing tax benefit under Section 80 C of the Income Tax Act, would remain locked-in for the period of 3 years from the date of allotment.

A. WHAT ARE THE INVESTMENT RESTRICTIONS?

Pursuant to Regulations, specifically the Seventh Schedule and amendments thereto, the following investment restrictions are currently applicable to the Scheme:

1. The Scheme shall not invest more than 10 per cent of its NAV in the equity shares or equity related

instruments of any company. All investments by the Scheme in equity shares and equity related instruments shall only be made provided such securities are listed or to be listed.

2. The Mutual Fund under all its Scheme (s) shall not own more than ten per cent of any company's paid-up capital carrying voting rights or ten percent of units of REITs issued by single issuer, as the case may be. Provided, investment in the asset management company or the trustee company of a mutual fund shall be governed by clause (a), of sub-regulation (1), of regulation 7B.
3. The Scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer, which are rated not below investment grade by a credit rating agency authorized to carry out such activity under the SEBI Act, 1992. Such investment limit may be extended to 12% of the NAV of the Scheme with the prior approval of the Trustee and the Board of Directors of AMC. However, in order to avoid inconsistency in investment by mutual funds in debt instruments of an issuer, irrespective of the scheme being actively or passively managed, it has been decided to introduce a similar credit rating based single issuer limit for actively managed mutual fund schemes. Accordingly, within the limits specified in the clause 1 of Seventh Schedule of the MF Regulation, following prudential limits shall be followed, for schemes other than Credit risk funds:

A mutual fund scheme shall not invest more than:

- a. 10% of its NAV in debt and money market securities rated AAA; or
- b. 8% of its NAV in debt and money market securities rated AA; or
- c. 6% of its NAV in debt and money market securities rated A and below issued by a single issuer.

The above investment limits may be extended by up to 2% of the NAV of the scheme with prior approval of the Board of Trustees and Board of Directors of the AMC, subject to compliance with the overall 12% limit specified in clause 1 of Seventh Schedule of MF Regulation.

Such limit shall not be applicable for investment in Government Securities, treasury bills and collateralized borrowing and lending obligations.

Provided further that investments within such limit can be made in the mortgaged backed securitized debt, which are rated not below investment grade by a credit rating agency registered with SEBI.

4. The Scheme shall not invest in unlisted debt instruments including commercial papers, except Government Securities and other money market instruments:

Provided that the Scheme may invest in unlisted non-convertible debentures up to a maximum of 10% of the debt portfolio of the Scheme subject to such conditions as may be specified by the Board from time to time:

Provided further that the Scheme shall comply with the norms under this clause within the time and in the manner as may be specified by the Board:

Provided further that the norms for investments by the Scheme in unrated debt instruments shall be as specified by the Board from time to time.

The unencumbered shares in a scheme shall mean shares that are not part of Securities Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrances.
 - iii. At all points of time the Mutual Fund scheme shall comply with the provisions at paragraph (i) and (ii) above. In case of any passive breach of the requirement at paragraph (i), the respective scheme shall have 7 trading days to rebalance the portfolio. During the rebalancing period, no additional call options can be written in the said scheme.
 - iv. In case the Scheme needs to sell securities on which a call option is written under a covered call strategy, it must ensure compliance with paragraphs (i) and (ii) above while selling the securities.
 - v. In no case, the scheme shall write a call option without holding the underlying equity shares. A call option can be written only on shares which are not hedged using other derivative contracts.
 - vi. The premium received shall be within the requirements prescribed in terms of Clause 12.25 of Master Circular dated June 27, 2024 i.e. the total gross exposure related to option premium paid and received must not exceed 20% of the net assets of the scheme.
 - vii. The exposure on account of the call option written under the covered call strategy shall not be considered as exposure in terms of Clause 12.25 of Master Circular dated June 27, 2024.
- a. The Scheme shall participate in repos in corporate debt securities as per the guidelines issued by SEBI and/ or RBI from time to time and the guidelines framed by the Board of Directors of Trustee Company and the Asset Management Company, from time to time.

At present the following conditions and norms shall apply to repo in corporate debt securities:

- i. The gross exposure of the Scheme to repo transactions in corporate debt securities shall not be more than 10% of the net assets of the Scheme.
- ii. The cumulative gross exposure through repo transactions in corporate debt securities along with equity, debt, units issued by REITs & InvITs and derivatives shall not exceed 100% of the net assets of the Scheme.
- iii. The Scheme shall participate in repo transactions only in AA and above rated corporate debt

- securities.
- iv. The Scheme shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of six months.
 - v. The Trustee and the asset Management Company have framed guidelines inter alia considering the following aspects:
 - a. Category of counterparty
 - b. Credit rating of counterparty
 - c. Tenor of collateral
 - d. Applicable haircuts
 - vi. Counterparty selection & credit rating: The counterparty must be an acceptable counterparty for debt transactions. The Mutual Fund follows a counterparty empanelment process for fixed income transactions and the same shall be used for selection of counterparties for corporate bond repos. All repo transactions in corporate bonds will be governed by a repo agreement as specified by FIMMDA and / or other specified authorities.
 - vii. Collateral tenor & quality: The exposure limit/investment restrictions prescribed under the Seventh Schedule of the Regulations and circulars issued there under (wherever applicable) shall be applicable to repo transactions in corporate bonds. The Scheme shall further follow guidelines framed by Trustee and the AMC from time to time.
 - viii. Applicable haircuts: Currently mutual funds are permitted to carry out repo transactions in government securities without any haircuts. The Reserve Bank of India has notified a minimum haircut based on rating of the corporate bond and other securities. In addition, the Fixed Income and Money Market Dealers Association (FIMMDA) would maintain a rating-haircut matrix on an ongoing basis. The Scheme shall further follow guidelines framed by Trustee and the AMC from time to time.

The haircuts seek to protect the lender of funds from the event of the counterparty failing to honor the repurchase leg of the repo. In such a circumstance, the Fund would suffer a loss if the value of the collateral depreciates by more than the haircut. The fall in the value of the collateral could be on account of higher yields and/ or deterioration of credit quality.

As the typical tenor of repos is short (typically overnight), the haircuts represent a relatively high degree of safety in relation to the interest rate risk on the collateral. The risk of collateral depreciation based on historical volatility is given in the table below:

Bond Tenor (yrs)	1	3	5	10
Price Volatility (%) (annualized)	0.6	1.2	1.7	3.4
Repo Tenor	Number of standard deviations needed to lose 10%			
1 day	258	136	94	48
7 days	98	52	36	18

In the above table, the price volatility of a 10-year bond is about 3.4% annualized. That is a 10% price move represents nearly a 3-sigma event on an annualized basis. For overnight tenors, this represents a 48-sigma event (for comparison a 6-sigma event occurs about once in a million observations).

It is apparent that the haircuts stipulated by RBI are more than sufficient to mitigate interest rate risk. Credit event risk remains (the collateral could default during the tenor of the repo). This risk is to be mitigated by ensuring that the collateral is acceptable from a credit point of view.

18. The mutual fund under all its schemes shall not own more than 10% of units issued by a single issuer of REIT and InvIT.
19. The Scheme shall not invest –
- i. more than 10% of its NAV in the units of InvIT; and
 - ii. more than 5% of its NAV in the units of InvIT issued by a single issuer.

The exposure limit/ investment restrictions prescribed under the Seventh Schedule of the Regulations and circulars issued there under (wherever applicable) shall be applicable to repo transactions in corporate bonds.

The Scheme will comply with the other Regulations applicable to the investments of Mutual Funds from time to time. All the investment restrictions will be applicable at the time of making investments.

The AMC/Trustee may alter these above stated restrictions from time to time to the extent the Regulations change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its respective investment objective

Internal Norms for Investment Restrictions

Fund has policy of Internal Norms for Investment Restrictions also within the overall limit prescribed by SEBI which is being reviewed from time to time, depending upon the market conditions.

According to this policy, limits on exposure to sectors, industries, companies etc. will be fixed to avoid concentration of portfolio in particular sectors so as to ensure appropriate diversification/security for the Fund.

The purpose of this policy will be to make investments in the full spectrum of permitted investments in order to achieve the investment objective of the scheme. Internal risk parameters for limiting exposure to a particular scrip or sector may be prescribed from time to time to respond to the dynamic market conditions and market opportunities.

Investment by TAMCO in the Schemes

The Asset Management Company (TAMCO) can also invest in any of the schemes, subject to a maximum exposure of 100% of the net worth of TAMCO or as decided by the Board of TAMCO & TITCO from time to time and the AMC shall not be entitled to charge any fees on such investments. It will, however, be subject to 20/25 norms i.e. regarding minimum number of investors and single investor holding contained in guidelines issued by SEBI vide circulars dated December 12, 2003 and June 14, 2005.

Any scheme may invest in other schemes under the management of TAMCO/or schemes of any other Mutual Funds.

The aggregate inter-scheme investment under TAMCO in schemes under the management of any other AMC shall not exceed 5% of the Net Asset Value of the Fund. No fees shall be charged for investing in other schemes of other funds or any other Mutual Fund.

Accordingly, the entire income of Taurus Mutual Fund is exempt from income-tax. Taurus Mutual Fund will receive all its income without deduction of tax at source as per provisions of Section 196 of the said Act.
2. With effect from April 1, 2020, income distributed by a mutual fund in respect of units of mutual funds is taxable in the hands of the unitholders at normal tax rates (plus applicable surcharge and cess).
3. Basic Tax shall be increased by surcharge as per applicable rate and Health & Education Cess at the rate of 4% on aggregate of basic tax & surcharge.
4. Non-Equity Funds are those funds wherein equity exposure is less than 65% of total proceeds of such fund.

As per Section 50AA of the Income-tax Act, 1961, investments in Specified Mutual Funds on or after April 1, 2023 shall be deemed to be short term capital assets irrespective of holding period.

- (i) Up to 31st March 2025, a “Specified Mutual Fund” means a Mutual Fund by whatever name called, where not more than 35% of its total proceeds is invested in the equity shares of domestic companies. The percentage of equity shareholding held in respect of the Specified Mutual Fund shall be computed with reference to the annual average of the daily closing figures. It is possible that an “equity-oriented fund” which invests in units of another equity fund instead of investing directly in equity shares of domestic company may be regarded as “specified mutual fund” and taxed accordingly.
- (ii) From 1st April 2025 onwards, a “Specified Mutual Fund” means: (a) a Mutual Fund by whatever name called, which invests more than 65% of its total proceeds in debt and money market instruments; or (b) a fund which invests 65% or more of its total proceeds in units of a fund referred to in (a). The percentage of investment in debt and money market instruments or in units of a fund, as the case may be, in respect of the Specified Mutual Fund, shall be computed with reference to the annual average of the daily closing figures.

5. The Mutual Fund will pay/deduct taxes as per the applicable tax laws on the relevant date considering the

provisions of the Income-tax Act, 1961 read with the Income-tax Rules, 1962 and any circulars or notifications or directives or instructions issued thereunder. Please note that grant of DTAA benefit, if any, is subject to fulfilment of stipulated conditions under the provisions of the Income-tax Act, 1961 and the relevant DTAA as well as interpretation of relevant Article of such DTAA.

In case of Resident Investors: TDS is applicable at the rate of 10% on income distributed in excess of Rs.5,000 by a mutual fund.

In case of Non-Resident Investors: TDS is applicable on any income in respect of units of a Mutual Fund at lower of 20% (plus applicable surcharge and cess) or rate of income-tax provided in the relevant DTAA (read with CBDT Circular no. 3/2022 dated 3rd February 2022), provided such investor furnishes valid Tax Residency Certificate (TRC) for concerned FY. Tax will be deducted on Short-term/Long-term capital gains at the tax rates (plus applicable Surcharge and Health and Education Cess) specified in the Finance (No. 2) Act 2024 at the time of redemption of units in case of Non-Resident investors (other than FII) only.

TDS at higher rates: TDS at twice the applicable rate in case of payments to specified persons (excluding non-resident who does not have a Permanent Establishment in India) who has not furnished the Income Tax Return (ITR) for the assessment year relevant to previous year immediately preceding the financial year in which tax is required to be deducted, for which time limit for filing ITR has expired and the aggregate of TDS in his case is Rs.50,000 or more in the said previous year. In case PAN is not furnished, then TDS at higher of the rates as per Section 206AB or Section 206AA would apply. In case PAN is inoperative, then TDS as per Section 206AA would apply, subject to Rule 37BC of the Income-tax Rules, 1962.

The above income-tax/TDS rates are in accordance with the provisions of the Income-tax Act, 1961 as amended by Finance (No. 2) Act 2024. The above rates are based on the assumption that the mutual fund units are held by the investors as capital assets and not as stock in trade.
