Dear Unit Holders,

We thank you for the trust reposed in us and our team.

The year gone by was relatively less challenging as compared to the previous few years given the fact that we had a government with a majority in the Indian Lok Sabha after a period of 30 years. The last time a single party had a majority being in 1984 when Rajiv Gandhi led the Congress to a landslide majority in the wake of the assassination of Indira Gandhi.

The majority in the Lok Sabha resulted in expectations in India rising sharply and resulted in the stock market valuations rising sharply with several stocks rising dramatically. The NIFTY rose by 1770 points to 8491 points, a rise of 26% as compared to the beginning of the FY and the BSE Benchmark SENSEX rose to 27957 points or 25 %.

The RBI in the meantime performed its functions adroitly and the direction of its policy was aimed at ensuring stability of the INR and stable liquidity in the system. While ensuring this, the RBI also reduced the Repo Rate to 7.50%, a drop of 0.50% as compared to the start of the FY and reduced the SLR to 21.5% from 23% during the FY. The CRR was though left unchanged.

Globally the US economy continued its sure footed upward trajectory and the Indian markets watched tentatively in anticipation of an increase in the US interest rates which may have directed the fund flows towards US gilts. The US, however did not increase its interest rates. The continuing US recovery is important for the global economy as of now given that the US is the largest economy in the world.

Europe continued with its tensions. Though it appeared stable, the undercurrents are uncomfortable as far as some of the European nations especially the PIGS (Portugal, Italy, Greece and Spain) are concerned. It will be good if the EU nations can sustain together as they have in the past few years despite odds. If they don't it may have a temporary negative impact on the global markets.

Within Asia the Syrian Civil War which was showing signs of abating till last year was joined by a sinister and more violent terrorist organization which if left uncontrolled may have the potential of sowing a wider conflict across the world and which needs to be controlled, if required by force for the overall good of that region, the world and humanity.

While the Russian economy struggled in the wake of the sanctions imposed on Russia, closer home the Chinese stock market continued on its course of achieving life time highs despite a visible slow down in the Chinese economy. One needs to see how long this anomaly in China continues.

Overall, within India the Balance of payments improved on the basis of a reduced price of Crude globally. The drop in crude prices also helped in increasing the Forex Reserves of the country. The wholesale inflation also trended lower. The expectations from the current government are running high and though the direction of the Government seems right the need of the hour apparently is to speed up matters, which has its own challenges with the opposition. India continues to crave for a better infrastructure so that its immense potential can be fully tapped quickly to become a global leader in the near future.

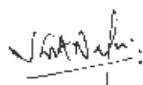

Despite all of the above, the Assets Under Management of the Indian Mutual Fund Industry rose to record highs recording an AUM of INR 12.02 lac crores. The FIIs also appeared to be bullish on India with net inflows in Equity of INR 1,11,333 crores and net inflows in debt of INR 1,66,127 crores.

The next few years should be good for the economy and as a corollary for the Indian MF industry.

We have added in the previous year seasoned and pedigreed professionals across the company and are geared up to deliver superior results without losing focus of the basics viz superior fund management and seamless client servicing.

Thank you

Yours Truly

TRUSTEES REPORT FOR THE FINANCIAL YEAR 2014-15

Dear Friends,

We are pleased to present the 21st Annual Report and Audited Financial Statements of the Schemes of Taurus Mutual Fund for the year ended March 31, 2015.

ECONOMIC SCENARIO AND FUTURE OUTLOOK

"A political mandate for reform and a benign external environment have created a historic moment of opportunity to propel India onto a double-digit growth trajectory. Decisive shifts in policies controlled by the Centre combined with a persistent, encompassing, and creative incrementalism in other areas could cumulate to Big Bang reforms."

This opening remark in the Economic Survey (2014-15), presented eloquently the narrative for the financial year under consideration: a historic political mandate and a step towards reform. The macroeconomic fundamentals of the domestic economy had splendidly changed for the better marked by a reduction in inflation (CPI) from a peak of around 10% to the levels of around 5%, a rapid improvement in the current account deficit situation which is expected to be around 1% of the GDP for this financial year.

Based on the new growth estimates GDP (at constant prices) moved up to 7.30% (for FY15) up from 6.90% (for FY14). The period also marked a relative stability in the value of the INR along with liquidity and was among the better performers vis a vis other currencies against the USD. Foreign portfolios had also been extremely robust in the last financial year (around INR 2770 billion); aiding a downward pressure on long term rates by around 120 basis points and a significant rise in equity indices. Aiding the entire macroeconomic improvement was a falling crude oil: as crude declined by almost 50% in the last financial year delivering a favorable "terms-of-trade shock" and helping the benign inflation. RBI also, in view of the disinflationary conditions evolving cut the benchmark repo rates by 75 basis points.

Driven by a strong political mandate, the new government has undertaken a slew of reform measures, the cumulative impact of which has the potential for boosting the economic growth. What may also aid the entire reform process is the ability to push through Goods and Service Tax in the coming year.

The worrying point for the economy seemed to be growing bad loans of the banking industry, a sluggish capital formation and low productivity. While steps are being taken to alleviate the problems, the progress needs to be hastened.

With the new financial year, certain risks loom large on the horizon. A poor monsoon season has the potential to create upward pressure on inflation, a volatile and upward crude price has the potential to reverse the favorable terms-of-trade and potential rising interest rates in US can create temporary potential capital volatility. We are hopeful that the government, will pursue the path of reform, governance and usher in the objective of "wiping every tear from every eye" of the poor and the vulnerable.

OVERVIEW OF THE MUTUAL FUND INDUSTRY PERFORMANCE

Mutual Fund industry has evolved over the years and it continued expanding its asset base in the current year. The closing net assets of the industry as on March 31, 2015 were Rs 10.83 lakh crores vis a vis Rs 8.25 lakh crores as on March 31, 2014. As such, assets under management grew by 31.27% during the year. The net sales of the industry across all asset classes increased to Rs 1.03 lakh crores from Rs 0.54 lakh crores last year. During the year, Equity and ELSS Schemes saw a reversal in trend of negative net sales which was continuing for last two years where net sales of Rs 0.71 lakh crores were achieved in these Schemes, constituting 68.93% of the net sales for the year. Average net assets in the March 15 quarter improved to Rs 11.89 lakh crores compared to Rs 9.05 lakh crores over the corresponding previous period quarter. The number of folios which were also facing a declining trend experienced a growth of 5.54% over FY 14.

The Securities and Exchange Board of India (SEBI) announced certain measures to widen customer base as well as increase penetration of mutual funds. Some of the measures are as under:

- Facilitating transactions in Mutual Fund schemes in non demat mode through stock exchange platform.
- Enhancing the scope of Consolidated Account Statement (CAS) to cover all securities assets. This move from the regulator is pursuant to an announcement in the budget for creation of one record for all financial assets.
- Amending product labelling disclosures to bring more transparency on risk awareness about the Mutual Fund products.

The transaction through stock exchange platform without demat account is a big step. This would allow Independent Financial Planners to use and carry out Mutual Fund transactions which were earlier accessible only to brokers and sub-brokers. Given the concrete performance of the equity markets, the Industry will now have to work towards increasing the number of customers and folios.

PERFORMANCE OF TAURUS MUTUAL FUND AND ITS FUTURE PLANS

During the financial year, overall performance of Taurus Mutual Fund has improved both in terms of the average net assets as well as performance of its various schemes. The average net assets of the Schemes of Taurus Mutual Fund for FY 15 were Rs 4194 crores i.e. increased by 19.61% over previous year. Similarly, gross sales increased to Rs 128,718 crores from Rs 90,864 crores in the previous year.

The market conditions for both Equity and Income schemes were reasonably favourable for the Mutual Fund. Most of the Schemes managed by Taurus Mutual Fund have outperformed their respective benchmark indices.

During the year, Taurus Gilt Fund was merged with Taurus Dynamic Income Fund with effect from September 18, 2014 after taking necessary approval from SEBI and complying with other regulatory requirements. At present, Fund is managing eight open ended equity oriented schemes and five open ended debt oriented schemes.

In the coming years, our efforts will be to improve the operations further, both in terms of increase in AUM and Returns. As such, the focus will be on improving investment performance and adding value to customers. Though, Taurus witnessed a marginal reduction in the number of folios but during the same period, number of Institutional clients has gone up. Fund is also planning to educate investors on the advantages of financial planning and benefit of investing in difference asset class.

Taurus Discovery Fund:

This is an open-ended equity growth scheme with a focus on medium and small size companies. Duration	Returns (%)			
	NAV-Existing Plan (EP)	NAV-Direct Plan (DP)	S&P BSE 100	Additional Benchmark CNX Nifty

Taurus Tax Shield:

This is an open-ended equity linked tax saving scheme with an endeavour to provide long term capital appreciation by investing in a portfolio of equity and equity-linked securities. Being a tax saving scheme, there is a lock-in period of 3 years from the date of allotment. Further, an investment up to Rs 1.50 lakh in Taurus Tax Shield scheme by an individual or HUF is eligible for deduction under section 80C of the Income Tax Act, 1961. The performance of the scheme in comparison to two benchmark indices is given below:

Duration	Returns (%)			
	NAV-Existing Plan (EP)	NAV-Direct Plan (DP)	S&P BSE 200	Additional Benchmark CNX Nifty
6 Months	11.49	11.58	8.79	6.61
1 Year	37.24	37.45	31.93	26.65

Portfolio outperformance for year under review is largely attributed to significant change in portfolio composition. Allocation to absolute ideas with large weight has helped outperformance. Avoiding large cash calls have also helped portfolio to do well in a secular rally of the market. Overweight position in capital goods, mid-caps and OMCs have played good role in beating the benchmark performance.

Taurus Infrastructure Fund:

This is an open-ended equity thematic fund with infrastructure as the basic theme, wherein investments are made in the equity shares of companies operating in the infrastructure sector viz. Transport, Power, Petroleum, Steel, Oil & Gas, Telecom, etc. The performance of the scheme in comparison to two benchmark indices is given below:

Duration	Returns (%)			
	NAV-Existing Plan (EP)	NAV-Direct Plan (DP)	S&P BSE 200	Additional Benchmark CNX Nifty
6 Months	16.09	16.35	8.79	6.61
1 Year	51.85	52.61	31.93	26.65
3 Years	17.71	N.A	17.89	17.03
5 Years	6.36	N.A	9.96	10.09

Taurus Banking & Financial Services Fund:

The primary objective of the Scheme is to generate capital appreciation through a portfolio that invests predominantly in equity and equity related instruments of Banking, Financial and Non Banking Financial Companies that form part of the BFSI Sector. The performance of the scheme in comparison to two benchmark indices is given below:

Duration	Returns (%)			
	NAV-Existing Plan (EP)	NAV-Direct Plan (DP)	S&P BSE Bankex	Additional Benchmark CNX Nifty
6 Months	12.96	14.18	18.45	6.61
1 Year	35.01	36.86	43.18	26.65
Since inception (EP: May 22, 2012 & DP: Jan 02, 2013)	21.44	11.80	26.39 (EP) 16.91(DP)	21.54 (EP) 16.80 (DP)

Bankex is the most concentrated benchmark in India with total of only 12 stocks and top 5 stock holding 85% of the weights and top 2 with 55%. The volatility in top holdings of Bankex impacts relative performance of fund in the short term. Portfolio underperformed the index due to allocation of asset to PSU banks during the year.

Taurus Ethical Fund:

Taurus Ethical Fund is an open-ended equity fund which aims to provide capital appreciation and income distribution to the unitholders through investment in a diversified portfolio of equities, which are based on the principles of shariah. This is the first actively managed shariah based fund in India. The performance of the scheme in comparison to two benchmark indices is given below:

Duration	Returns (%)			
	NAV-Existing Plan (EP)	NAV-Direct Plan (DP)	S&P BSE 500 Shariah	Additional Benchmark CNX Nifty
6 Months	13.27	13.54	10.65	6.61
1 Year	47.01	47.71	41.87	26.65
3 Years	24.27	N.A	22.93	17.03
5 Years	14.69	N.A	12.77	10.09
Since inception (EP: Apr 06, 2009 & DP: Jan 01, 2013)	27.08	30.41	20.73 (EP) 27.83(DP)	17.35 (EP) 17.14 (DP)

This Scheme has done well vis a vis the CNX Nifty benchmark across all time periods. It has also outperformed the S&P BSE 500 Shariah Index across all the periods. The composition of portfolio towards engineering, FMCG and consumer internet has helped the portfolio to outperform the diversified benchmark. Stock specific mid cap positions have also helped fund to do well in the volatile market.

Taurus Nifty Index Fund:

The index fund continues to track the performance of its benchmark index, the Nifty. The fund portfolio consists of the stocks in the same weight as they are in the nifty Index. The strategy of the investment is to mirror the index return by minimizing the tracking error with its benchmark.

Duration	Returns (%)			
	NAV-Existing Plan (EP)	NAV-Direct Plan (DP)	CNX Nifty	Additional Benchmark CNX Nifty
6 Months	6.36	6.68	6.61	6.61
1 Year	26.47	27.28	26.65	26.65
3 Years	16.97	N.A	17.03	17.03
Since inception (EP: June 19, 2010 & DP: Jan 02, 2013)	10.03	17.16	10.12(EP) 16.80(DP)	10.12(EP) 16.80(DP)

The Scheme primarily mirrors the performance of the benchmark index. Change in cash flows and constituencies of index influences the tracking errors.

Taurus Ultra Short Term Bond Fund:

This is an open end Fund with investment objective is to generate returns with higher liquidity and low volatility from a portfolio of money market and debt instruments. The performance of the scheme in comparison to Crisil Liquid Fund Index, the benchmark index along with its additional benchmark is given below:-

Duration	Returns (%)			
	NAV-Existing Plan (EP)	NAV-Direct Plan (DP)	Crisil Liquid Index	Additional Benchmark CRISIL 1 Yr T-Bill Index
6 Months	4.69	4.76	4.32	4.54
1 Year	9.49	9.65	8.98	8.74
3 Years	9.85	N.A	8.89	7.62
5 Years	9.29	N.A	8.26	6.66
Since inception (EP: Dec 01, 2008 & DP: Jan 01, 2013)	8.55	9.92	7.56 (EP) 9.10 (DP)	6.19 (EP) 7.41 (DP)

The scheme dynamically managed the volatility, taking tactical allocations and at the same time met the investors' aspiration by outperforming the benchmark at various time periods.

Taurus Short Term Income Fund:

This is an open-ended debt fund whose investment objective is to "generate income and capital appreciation with low volatility by investing in a diversified portfolio of short term debt and money market instruments." The initial investment strategy for the scheme was to invest in securities of medium to long-term maturity.

Duration	Returns (%)			
	NAV-Existing Plan (EP)	NAV-Direct Plan (DP) Fund Index	Crisil Short Term Bond T-Bill Index	Additional Benchmark CRISIL 1 Yr
6 Months	4.61	4.70	5.27	4.54
1 Year	9.67	9.83	10.31	8.74
3 Years	10.04	N.A	9.40	7.62
5 Years	9.46	N.A	8.31	6.66
Since inception (EP: Aug 18, 2001 & DP: Jan 01, 2013)	6.80	10.01	6.74 (EP) 9.42 (DP)	5.90 (EP) 7.41 (DP)

The Scheme has underperformed its benchmark during the period under consideration. The underperformance in this period was because of scheme keeping assets of lower duration and with fall in short term rates, the scheme underperformed its benchmark. The duration was managed in a manner so as to protect the investors from adverse movement in interest rates.

Taurus Dynamic Income Fund:

Taurus Dynamic Income Fund was launched in January 2011. This is an open-ended debt fund which aims to generate optimal returns with high liquidity through active management of the portfolio by investing in Debt and Money Market instruments. The performance of the scheme in comparison to the benchmark indices is given below:

Duration	Returns (%)			
	NAV-Existing Plan (EP)	NAV-Direct Plan (DP)	CRISIL Composite Bond Fund Index	Additional Benchmark CRISIL 10 yr Gilt Index
6 Months	4.63	4.81	7.89	9.25
1 Year	8.45	8.86	14.54	14.57
3 Years	7.27	N.A	9.32	8.07
Since inception (EP: Feb 14, 2011 & DP: Jan 04, 2013)	8.09	6.48	8.95(EP) 9.06(DP)	6.89(EP) 6.61 (DP)

The scheme underperformed the benchmark as the scheme had low assets under management (AUM) which limited the scheme's ability to effectively take advantage of the rate movements. The focus will be on increasing AUM and concentrated effort in yielding better performance.

Taurus MIP Advantage:

Taurus MIP Advantage was launched in June 2010. This is an open-ended fund which aims to take advantage of diversification through a portfolio of fixed income securities, Gold ETF and equity and equity related instruments. The performance of the scheme in comparison to the benchmark indices is given below:

Duration	Returns (%)			
	NAV-Existing Plan (EP)	NAV-Direct Plan (DP)	75% -CRISIL MIP Blended Fund Index and 25%-Price of Gold	Additional Benchmark CRISIL 10 yr Gilt Index
6 Months	6.57	6.92	5.57	9.25

3 Years	8.50	N.A	7.29	8.07
Since inception (EP: Aug 06, 2010 & DP: Jan 01, 2013)	8.44	8.23	8.72 (EP) 6.22(DP)	6.60 (EP) 6.81(DP)

The scheme initiated allocation to GOI security selectively when the opportunity arose. The equity allocation focussed mainly on the large cap. The equity allocation, however, got changed with the market volatility.

Taurus Liquid Fund:

This is an open-ended Scheme with investment objective to generate steady and reasonable income with low risk and high level of liquidity, from a portfolio of money market securities and high quality debt. The performance of the Scheme in comparison to its benchmark indices is given below:

Duration	Returns (%)			
	NAV-Existing Super Institutional Plan (EP)	NAV-Direct Super Institutional Plan (DP)	CRISIL Liquid Fund Index	Additional Benchmark CRISIL 1 Yr T-Bill Index
6 Months	4.38	4.40	4.32	4.54
1 Year	9.10	9.16	8.98	8.74
3 Years	9.36	N.A	8.90	7.62
5 Years	8.58	N.A	8.26	6.66
Since inception (EP: Aug 31, 2006 & DP: Dec 31, 2012)	6.56	9.33	7.64 (EP) 9.10 (DP)	6.43 (EP) 7.42 (DP)

The Scheme continued to deliver better returns vis a vis its peers and thus helped in garnering higher inflows during the year. The scheme tactically maintained a prudent allocation between different assets during the year and also maintaining the liquidity of the portfolio. The scheme as such continued to witness healthy Assets under Management.

15 In Taurus Starshare, the holding statement being received from the Custodian is reconciled with the books on an on-going basis. However, statement of Depository Account with NSDL indicates certain scrips in excess of the Scheme's holding, presumably on account of nontransfer of scrips by the transferee. On the advice of the respective Board of TAMCO and TITCO, the issue was legally examined by International law Group, a legal firm and as per their views the Fund is not the rightful owner of the shares and has to continue to hold the shares in trust on behalf of the purchasers. Accordingly, the custodian has been instructed to continue to hold the securities. Further, the matter has been referred to SEBI.

16 In the case of Taurus Bonanza fund, the contract for sale of investments Rs 54,95,000 (Previous year Rs 54,95,000) was executed in the year 1996 and the underlying instruments were delivered, but the sale proceeds were not received, for which provision has been made for the entire amount.

17 There are no underwriting commitments.

18 The schemes have not made any investment in repo transactions or credit default swap in corporate debt securities.

19 In line with SEBI circular no. CIR/IMD/DF/21/2012 dated September 13, 2012; amount of 2 bps points (0.02%) of daily net assets is set apart in all the schemes of Taurus Mutual Fund within the maximum limit of TER for investor education and awareness initiatives (IEAI). small
Many/ parts can make a whole.
INVEST THAT MONEY TO
REACH YOUR
BIG GOAL.

SYSTEMATIC INVESTMENT PLAN (SIP)

Little by little, it can build up to a whole lot more. It all depends on fitting the small parts together with the right plan. SIP allows you to put aside fixed amounts at regular intervals over a pre-set term.

By cashing in on the power of compounding over a period, it rewards you for your disciplined & responsible approach.

Benefits of Systematic Investment Plan (SIP)

Allows you to invest small fixed sum of money at regular intervals - light on the wallet

SIP makes volatility work in your favour - reduces risk

Benefit of Rupee Cost Averaging - get more units at lower NAV, less units at higher NAV

Power of compounding comes into play - the early you start higher are the returns

Imparts time - tested discipline to investing - key to financial success
